## Ripple effect of global warming

**Barbara Litzlbeck**

Nov 8, 05 11:24am

Human health and the ecosystems are increasingly threatened by climate change, warns a new study jointly released by three leading environmental organisations at the United Nations last week.

*Climate Change Futures*, by the Centre for Health and the Global Environment at Harvard Medical School, the United Nations Development Programme (UNDP) and Swiss Re, a private health insurance company based in Switzerland, says that adverse health impacts are likely to cause severe economic consequences.

- ▶ Threat to human health
- ▶ Coral reef decline
